

DREAMER FUND

Building a Partnership with the Dreamer Fund

Partnerships are a valuable way to collaborate and work with community organizations, educational institutions and other like-minded groups. Partnerships include stable leadership, vision, and the necessary drive to build networks to resolve issues affecting our communities – together.

In an effort to build long-lasting partnerships, our goal is to cultivate an understanding of our partner's work by understanding their culture, appreciating their values, working with their organizational framework, and comprehending their vision.

Through shared objectives, the Dreamer Fund hopes to work with organizations in order to advance each other's missions in an organic way. This entails building capacity together as partners in an underserved and underrepresented community, but also evolving jointly and adjusting as we learn about different issues and different approaches.

We are committed to working towards the good of the community that we serve. As our partner, we would work with your team collectively to bridge gaps in the services that are needed by undocumented and immigrant students and by enhancing our programmatic impacts.

Our vision is to come to your area and provide students, staff, faculty, organizers, family and allies with the necessary tools and resources that will be helping in successfully applying to graduate school. We tailor our resources and presentations to the needs of your community. We also provide mentorship and volunteer opportunities for persons interested in learning more about law school and advancing the 'undocumented and immigrant graduate-level student' blueprint.

By accepting to be our partner, we would like to list you on our website as an educational institution or organization that we collaborate with. No other information will be posted about you. We only ask that you grant us permission to tell our community who we are working with and/or who shares our vision.

We look forward to having you as our partner. If our visions do not align at this time, don't worry. Our door is always open for future collaborations.
